### DETAILED ACTION

1. Applicant's election of Group I (claims 2-6) and species "A", depicted by Fig. 2 in the reply filed on July 06, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 7 and 8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 06, 2004.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Minko ('489).

Minko discloses a light beam receiver for a laser beam comprising a reflection surface (12), wherein the reflection surface comprises a reflector prism having at least two reflector surfaces (34,36,38) inclined towards the laser beam at an angle less than 45 degrees.

Note figures 1-4 and 13 along with the associated description thereof.
5. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
